Product Summary

In Considerably Detailed Research and Elaborate Developing Process, The Expectations from Clients, Invention Patent Technologies by Our Engineering Team and the Vision of “Perfect Imagery in Reality” are Joined to form the Spirit and Performance of Uscan D G70.

  **Note:** Sale and purchase of Ultrasound Scanner are done strictly as per applicable PC & PNDT guidelines.

Product Description

Inspired Invention Patent Technology For Pure Image: - ePure – Unique Speckle Reduction Technology guarantee a fine image. - 3D Imaging more accuracy, details, and connections to what is beyond the surface. - 4D imaging visualize the lively “energy and movement”. - Self-adaptive Color Artifact Clearance automatically identify noise and useful information to suppress the noise caused by breath or transducer movement. Additional Imaging Technology Specialties Include: - eView Panoramic imaging technology and Trapezoid Imaging to extend the visualization and possibility. - eSCI Spatial Compound Imaging. - eFCI Frequency Compound Imaging. - THI Tissue Harmonic Imaging & TSI Tissue Specific Imaging. - MBP Imaging enhance frame rate and gain precise details of the target (a total of 3 levels). Intelligent Workflow: - eSpeed Instant Image Optimization. - User Defined Keys. - Massive Storage Capacity and Flexible Data Management through DVD-RW, USB ports, DICOM 3.0. - Comprehensive Software Package Includes Urology, Cardiology, Orthopedics, OB/GYN, Vascular, Transvaginal Doppler, and More. Extraordinary Ergonomics: - High Resolution 17” LCD monitor with Adjustable Articulating Arm. - Four Transducer Sockets for Flexibility. - Intuitive Control Panel Design. - Stress Reliving Foot Switch. - Backlit Keyboard.
